

# TECHNICAL CONSULTANT & PROJECT MANAGER CHARGING INSTRUCTURE (M/F/D)

## Job Details:

**Employee Type:** full-time or part-time

**Starting date:** immediately

**Contact:** Johanna Schwöbel, Team Charging Services

**Application Documents by e-mail to:** [bewerbung@inno2grid.com](mailto:bewerbung@inno2grid.com)

We, **inno2grid GmbH**, are a young, dynamic joint venture of the DB E.C.O Group and Schneider Electric based on the EUREF campus in Berlin. Since 2015, we have been working on integrated end-to-end solutions in energy and mobility for areas and quarters, cities and municipal utilities, companies and businesses. Energy and transport transition go hand in hand, but in our opinion, there is a lack of ready-made solutions for the implementation of renewable and decentralized energy supply in combination with mobility. We tackle the challenge of reconciling the different perspectives of consumers, energy suppliers and infrastructure operators. Based on our consulting experience, we develop new, innovative IT and service solutions as holistic, customer-specific solutions.

With its partner network, the **Team Charging Services** offers infrastructure and services for electromobility and decentralized energy supply throughout Germany. For the individual charging station up to mobility stations, we pursue our end-to-end approach, from conceptual design and planning to roll-out and installation to operation, including billing and customer service with 24/7 availability. Supported by software products from the Digital Solutions team and in direct exchange with the experts in the Consulting team of inno2grid, we accompany our customers in their implementation of the energy and transport transition.

You want to not only think about the energy and transport transition with enthusiasm, talent and expertise, but also implement it? Then you're an excellent problem solver for the complex, novel challenges our customers face as a result. Join our team and let's make an important contribution together!

## What you'll do:

- Through your cooperation in the projects, you expand and maintain our existing network of trades and partners and support our sales department in the preparation of offers
- You will take on the management of Germany-wide implementation and service projects for charging infrastructure, advising and assisting customers with the installation and operation of AC and DC charging stations:

- installation and operation-related consulting with demand and location analyses
- contractual coordination with customers/site partners, support of approval processes if necessary
- Conceptual design, planning and project planning of the charging infrastructure project
- Commissioning, controlling and monitoring of the responsible electrical and construction trades during implementation and subsequent operation
- You actively contribute your experience from your projects to the product management of our software solutions and coordinate closely with our consultants on customer requirements

### **What you bring:**

- A successfully completed technical degree in electrical engineering or related field or an (electrical) technical apprenticeship
- Ideally 1-3 years of professional experience as a consultant and/or in project management
- A quick grasp, structured approach and above-average organizational skills
- Communication talent and social skills to contribute to the long-term loyalty of our customers and partners
- Very good German and good English skills
- Good MS Office skills

### **What we offer:**

- A young, diverse team of approx. 60 employees with flat hierarchies, a goal- and value-oriented mentality and a passion for new things
- A dynamic and secure working environment in a joint venture between the DB E.C.O Group and Schneider Electric, with the prospect of a long-term, varied career outlook
- A great deal of creative freedom and the ability to act on one's own responsibility
- Flexible working hours with mobile working
- A personal get-together at summer parties, team events, joint sports activities or simply lunch on our beautiful EUREF campus
- Benefits like a mobility budget (e.g. job ticket and bike, pool electric vehicle), company pension plan, fresh organic fruit in the office, ...

Does a varied job in a young company appeal to you?

Then we are looking forward to receiving your application with possible starting date to [bewerbung@inno2grid.com](mailto:bewerbung@inno2grid.com)!
