

# PROJECT MANAGER INNOVATION HUB (M/F/D)

## Application details:

**Type of position:** full time

**Entry date:** as soon as possible

**Contact person:** Simon Bauer, Team Digital Solutions

**Application documents per mail to:** [bewerbung@inno2grid.com](mailto:bewerbung@inno2grid.com)

inno2grid **Digital Solutions** operates as the Digital Solution Centre for Schneider Electric and as such develops innovative solutions and software products along the existing hardware product portfolio. We are based on the EUREF campus in Berlin and have excellent opportunities to develop promising ideas in this environment. We want to break new ground and always be one step ahead when it comes to digitalisation - that's what drives us. We are looking for people who can contribute their enthusiasm, talent and expertise and shape digitalisation in the Energy and Mobility segments together with us.

## Your responsibilities:

As a Project Manager, your focus is on the planning and execution of research projects in the field of sustainable energy supply and mobility. In the *research project Mobility2Grid*, you coordinate the activities of inno2grid and support the research strategy in close coordination with the strategic project management. You are also responsible for actively participating in and organising workshops and conferences within the framework of the research project. In addition, you are responsible for communicating with partners from science and industry and shaping sustainable cooperation. As a contact person for the management, among others, you evaluate new innovative topics and take over the project impact.

You feel at home in our innovative working environment, where the requirements for products and solutions can change constantly. You are a team player and regularly discuss ideas, requirements and solution proposals with the project team.

## Main areas of activity:

- Content organisation and coordination of selected innovation projects
- Initiation, coordination and support of cooperations between science and business
- Establishment of regional, national and international networks of companies and research institutions and ongoing contact management
- Identification and assessment of new topics and trends in the fields of renewable energy, sustainable mobility, hydrogen economy and digital technologies
- Development of innovation projects

- Contact person for management on innovation issues, among others

### What you bring:

- Completed studies in the field of innovation management, business administration or economics, industrial engineering or a comparable degree programme
- Strong communication skills, customer-oriented thinking and basic technical understanding
- Sound knowledge of the energy industry
- At least 2 years of professional experience in project management, preferably research projects
- Confident handling of MS Office applications (esp. PowerPoint, Excel and Word)
- Independent, proactive and structured way of working and ability to work in a team
- High level of commitment, reliability and willingness to organise oneself
- Very good knowledge of German and English, both written and spoken

### Benefits

- Flexible working hours with the possibility for remote work
- Mobility budget for the flexible organisation of your working route
- Innovative workplace at the EUREF Campus and international environment

### inno2grid as an employer:

We are a young team and enjoy developing and implementing holistic, customer-specific solutions. Inno2grid is a joint venture between Schneider Electric and DB E.C.O., whose development is shaped by its employees.

A job at inno2grid offers you a varied activity in an innovative company with a high degree of **personal development potential**, the opportunity for self-fulfilment in **flat hierarchies** as well as the prospect of a **long-term professional perspective**. inno2grid relies on personalities who are characterised by entrepreneurial thinking and action, a goal- and value-oriented mentality and a passion for new things. In addition to the outstanding professional qualifications and competence of its employees, inno2grid relies on their above-average initiative and responsibility, ability to work in a team and flexibility, willingness to perform and motivation.

Whether on the beach volleyball court during the break or at a barbecue, it is important to the i2g team to spend time together not only in the office, even if it is in a particularly beautiful location on the **EUREF campus**.
